

# KLEENUP™

## What is KLEENUP™?

KLEENUP™ is a scientific formulation of natural ingredients based in and delivered by Micro Carbon Technology®.

## What does KLEENUP™ do?

KLEENUP™ balances the natural microbial ecosystems of soil and water for increased bio-oxidation capacity. In addition, it catalyzes the breakdown of chemical and petroleum products and promotes microbial proliferation causing the bio-degradation into harmless by-products of carbon dioxide, water and humus. It is effective in detoxifying and sequestering heavy metals in soil, plants and water. Resulting in more balanced ecosystems.

## DIRECTIONS FOR USE

- Shake well before use.
- Designed to be applied in water and/or soil.
- Best results will be obtained when product is evenly distributed across the water or soil surface.
- Apply KLEENUP™ as a spray with sufficient water to ensure uniform coverage.
- Do not apply this product in concentrations greater than 10%.
- For maximum results apply diluted product via spray application.
- Application timing, intervals and rates may vary according to individual situation, degree of contamination, existing available nutrient levels in the soil or water column, and overall condition of the site.
- Applications can be made as often as every 7 to 10 days as needed in soil or continuously based on flow in water.
- Consult your local PROBIOTIC SOLUTIONS® Representative for situation specific recommendations.

This product is intended as a biostimulant and detoxifier for microbial ecosystems.

### STORAGE AND DISPOSAL:

Do not store this product below 50°F (10°C) or above 90°F (30°C). Keep product in original container. Do not transfer into food or drink containers. Triple rinse when empty for recycling. Always dispose of container in accordance with local, state and/or federal regulations.
