Contact your local PROBIOTIC SOLUTIONS<sup>®</sup> Representative for optimal use conditions and any questions.

MICROPLEX<sup>®</sup> LM should be mixed with water and then sprayed over or sprinkled directly into the manure pit with mixing, or poured directly into the flow of water entering the lagoon. To break up a crust on a pit, use Crust Removal Application amount once per week, two weeks prior to pumping, and agitate the pit after each application. Your Probiotic Solutions<sup>®</sup> Representative will prepare an application schedule tailored to your waste-management program. A general range of potential doses is provided above.
